Professional Summary

Full Stack Developer and Forward Deployed Engineer with hands-on experience building AI-powered applications, business automation workflows, and full-stack software. Experienced in client interactions, on-site visits, requirement gathering, and translating business challenges into practical technical solutions. Skilled in React, TypeScript, Python, Supabase, and AI agent development, with a focus on delivering reliable software tailored to client needs.

Projects

IT Services ERP SaaS
Enterprise Business Management Platform | React.js, TypeScript, Supabase, Tailwind CSS, Zustand
- Built a production-ready ERP and CRM platform streamlining sales, operations, billing, and client management workflows.
- Designed secure and scalable backend systems with RLS, audit trails, concurrency control, and reliable transaction handling.

Multi-Business AI Reporting Assistant
WhatsApp-Based Business Intelligence Agent | Python, FastAPI, LangGraph, Supabase
- Built a WhatsApp-based AI assistant that retrieves business information from separate databases for a parcel logistics business and its associated fuel-station operations.
- Enabled natural-language business queries and contributed to automated report generation and delivery through WhatsApp.

Fuel Station Management System
Fuel Retail Operations Software | React, Supabase, Python
- Worked on a web application supporting fuel-station operations, including sales, stock information, and operational workflows.
- Worked with a Supabase-backed application for centralized fuel-station management.

Field Sales & Operations Platform
Mobile and Web-Based Field Operations System | Flutter, React, TypeScript, Supabase
- Contributed to a Flutter mobile application and React admin dashboard for field-sales activities, shop visits, and daily operations.
- Worked on GPS-based visit verification, odometer capture, route visibility, and database-backed workflows using Supabase RPCs and Row Level Security.

Offline-First Textile Factory Management System
Locally Hosted Factory Operations Application | React, TypeScript, Fastify, SQLite, Dexie
- Built an offline-first application for tracking fabric lots and production workflows across textile factory processes.
- Implemented local-server architecture and synchronization workflows with duplicate-operation prevention, conflict handling, role-based access, and audit history.

Lending & Loan Operations Platform
Multi-Role Financial Operations Application | React, TypeScript, Supabase
- Developed workflows supporting loan management, credit evaluation, recovery, field operations, telecalling, and accounting.
- Contributed to role-based authorization and loan-book import and validation workflows.

Professional Experience

Software Engineer (FDE)
Emilda & co
06/2026 – Present | Calicut,India
- Work directly with clients through requirement discussions, on-site visits, and workflow analysis to understand business challenges.
- Develop AI-assisted automations, agentic workflows, and full-stack applications tailored to operational requirements.
- Support implementation, system integration, testing, and refinement based on client feedback.

Freelance Full Stack Developer
Self-Employed
09/2024 – 04/2026 | Calicut,India
- Delivered client web applications featuring authentication, dashboards, responsive interfaces, and business workflows.
- Worked across frontend and backend development, application integration, deployment, and hosting.

Technical Skills

Languages
JavaScript, TypeScript, Python, SQL, HTML, CSS

Frontend
React.js, Vite, Tailwind CSS, Framer Motion, React Bits, 21st Dev, Lovable

Backend
Node.js, Express.js, Fastify, FastAPI, MongoDB, Supabase, PostgreSQL, SQLite, SQL, REST APIs, JWT Authentication, Middleware, CRUD, RBAC, RLS

Tools
Git, Postman, Figma, VS Code, npm, ChatGPT, Claude AI, Claude Code, GitHub Copilot, Gemini Flash, Docker, Antigravity, OpenAI Codex, Cursor, Grok, n8n, LangChain, LangGraph, Playwright, Vitest, Vercel, Render, Netlify, Resend

Education

Bachelor of Computer Science
College of Applied Science, IHRD, Calicut
2024 | Calicut, India

Certificates

Agentic AI with LangChain and LangGraph
IBM · Coursera | August 2026

MERN Stack Development Internship
Softroniics | June 2024 – February 2025
