Professional Summary

Full Stack Developer with hands-on experience in MERN stack development across client projects, freelance engagements, and enterprise software solutions. Expertise in building secure and scalable applications using React.js, Node.js, Express.js, MongoDB, and SQL, with strong knowledge of REST APIs, authentication systems, and role-based access control. Currently contributing to CRM platform development while leveraging AI-powered tools to accelerate development, improve code quality, and deliver efficient business solutions.

Projects

IT Services ERP SaaS

Enterprise Business Management Platform | React.js, TypeScript, Supabase, Tailwind CSS, Zustand

- Built a production-ready ERP and CRM platform streamlining sales, operations, billing, and client management workflows.
- Designed secure and scalable backend systems with RLS, audit trails, concurrency control, and reliable transaction handling.

Flexora

On-Demand Job Matching Platform | React.js, Node.js, Express.js, MongoDB, Tailwind CSS, JWT

- Engineered a full-stack MERN job platform with 3 user roles, JWT authentication, job posting, and application workflows for short-term hiring.
- Built a real-time admin dashboard with RBAC, approval workflows, and management for multiple user roles across 3 core modules

LiveKeralam

Event & Tourism Discovery Platform | React.js, Node.js, Express.js, MongoDB, Tailwind CSS

- Engineered a multi-role MERN platform with district/date filtering, admin approval workflows, and role-based event submission for Kerala tourism.
- Implemented district/date filtering across 14 districts with fast query performance.

Janani

Resort & Wellness Experience Website | React.js, Tailwind CSS

- Crafted a visually immersive resort website showcasing eco-friendly stays, Ayurvedic treatments, yoga programs, and traditional Kerala wellness experiences.
- Designed 5+ responsive pages for booking-focused browsing and premium hospitality presentation.

Arsenal Fitness

Gym & Fitness Web Platform | React.js, Tailwind CSS, Framer Motion, Node.js, Express.js, MongoDB

- Created a modern fitness website featuring membership plans, training programs, and responsive landing pages with premium UI and engaging animations.
- Built 6+ reusable UI components and optimized performance for mobile, tablet, and desktop devices.

Civic Eye

Citizen Complaint & Reporting Platform | React.js, Node.js, Express.js, MongoDB, Tailwind CSS

- Built a civic tech platform supporting media complaint submissions, status tracking.
- Implemented secure admin portal with RBAC, media validation, and 3-stage complaint lifecycle tracking.

Professional Experience

Full Stack Engineer

Ecrafftz
04/2026 – Present | Calicut, India

- Developing and maintaining a CRM platform used for business operations and workflow management.
- Building scalable frontend and backend modules using React, Node.js, Express.js, and databases.
- Enhancing system performance, user experience, and business process automation.

Freelance Web Developer

Self-Employed
01/2025 – 04/2026 | Calicut, India

- Developed and deployed web applications for clients and personal projects using the MERN stack.
- Worked on full-stack development, authentication systems, dashboards, and responsive UI implementations.
- Managed projects from requirements gathering to deployment and maintenance.

MERN Stack Developer Intern

Softroniics
06/2024 – 02/2025 | Calicut, India

- Built and maintained MERN applications, delivering features and bug fixes across client projects.
- Developed reusable React.js components using Tailwind CSS to accelerate UI development.
- Designed REST APIs with Node.js, Express.js, MongoDB, and SQL for scalable applications.
- Collaborated using Git workflows and code reviews across multiple repositories.
